DONJON TOWING AND TRANSPORTATION
PROJECTS ON THE RISE

Hillside, NJ -- Donjon Marine, Co., Inc., a global marine services provider based in New Jersey, has announced a number of marine transportation projects the company has been involved with over the last months. These services are in addition to the daily support Donjon's Transportation Division provides to Donjon's Dredging, Salvage, Marine Demolition and related marine activities:

- **SIMS Metals:** Donjon tugs transport the barges that carry all of the steel scrap in the New York/Metropolitan Area for SIMS Metals as part of a contract that runs through 2015. Donjon handles approximately 1,800,000 tons of mixed grades of scrap steel each year.
- **O&G Industries:** Donjon transports various types and grades of bulk stone products from two upstate New York quarries to various New York/Metropolitan Area receiving facilities in support of its customer, O&G Industries, and its customers. Donjon's agreement with O&G runs through Spring 2012. Donjon transports over 300,000 tons of stone per year as part of this services contract.
- **New York City Department of Sanitation:** In late May 2012, Donjon was awarded a competitively bid Marine Transportation Services contract to move all New York City Department of Sanitation Recycling Barges from various distribution points in New York City to a number of re-handling facilities throughout the area. Donjon moves at least one barge of recycled material per day, 365 days per year. This contract runs through 2015.

"Donjon continues to expand its Marine Transportation services based upon the needs of the company's various divisions, the needs of our customers, along with the needs of the marine community as a whole. This approach is consistent with Donjon's overall philosophy of well-planned growth in our target markets," said Steven G. Newes, Donjon's Vice President of Marine Transportation.

Donjon presently operates 14 tugboats, ranging in size from 1,200 to 8,000 horsepower, and works both nationally and internationally. Donjon's barge fleet includes more than 40 barges of various types ranging from 4,000 yd³ dump barges to Donjon's new 1400-ton capacity, 1400 series material barges. The 10 Witte Class material barges and cubic yard dump barge were built in Donjon's Erie, Pennsylvania, shipyard, Donjon Shipbuilding & Repair LLC.

Donjon Marine Co., Inc. (www.donjon.com) provides a broad spectrum of marine services, including dredging, marine salvage, heavy lift transport, tug/barge transportation, demolition, pollution control and remediation, shipbuilding and repair, as well as land-based metals recycling, demolition and landfill remediation/site management. Based in New York and New Jersey, Donjon and its affiliates maintain offices, assets and personnel throughout the Northeast, with operations spanning the globe.
